Mobile Device - Contact Me

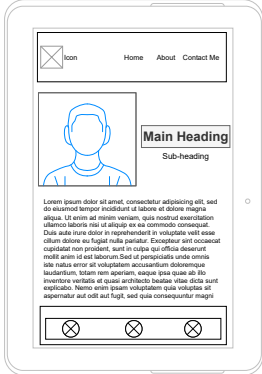

The mobile website wireframe features a streamlined, user-friendly layout. At the top, the **header** section includes a **collapsible navigation bar** with three menu options, allowing easy access to different parts of the site. Positioned on the left is a **branding icon** that reinforces the site's identity.

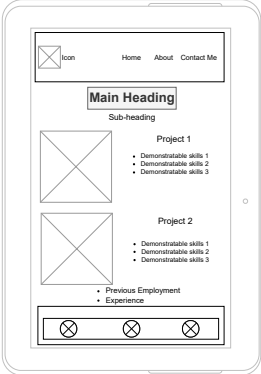

The **main** section of the homepage features a prominent **image of the user**, alongside a **main header** and a brief **about summary** that introduces the visitor to the website's purpose and content.

At the bottom, the **footer** includes a **copyright text** and **three social media icons** that link directly to the user's profiles, making it convenient for visitors to connect across platforms.

Tablet Device - Projects and Skills

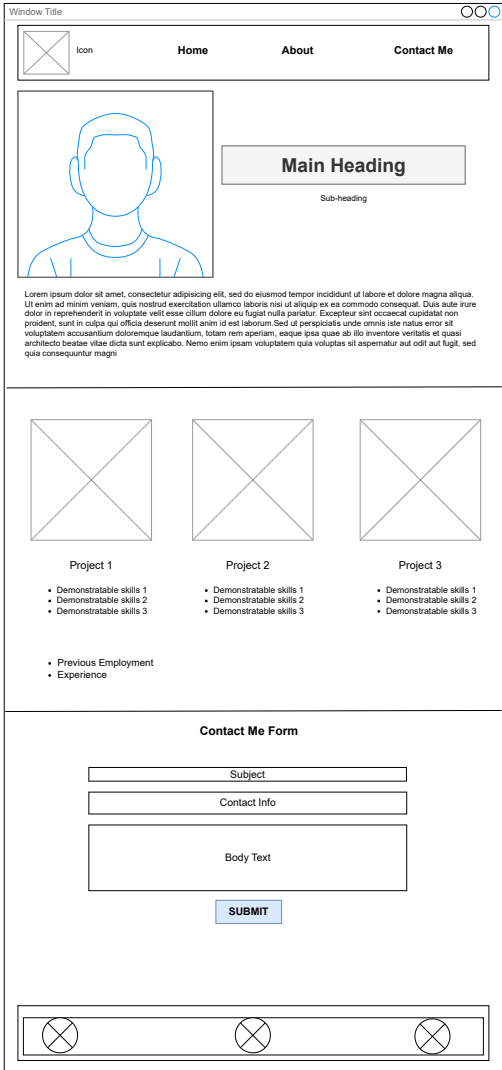

Tablet Device - Contact Me

The tablet-optimised website wireframe presents a spacious, user-friendly layout designed to showcase projects and demonstrable skills effectively. The **header** section now includes a full **navigation bar** with three visible menu options, eliminating the need for a collapsible menu and allowing immediate access to key sections. Positioned on the left is a **branding icon** to maintain a clear site identity.

The **main** section of the homepage features a larger **image of the user**, a main header, and an expanded **about summary**. Below, ample space is dedicated to showcasing **projects and skills**, providing a visually appealing layout that highlights key work and capabilities.

At the bottom, the **footer** retains a **copyright text** and **three social media icons** linking to the user's profiles, facilitating easy connectivity.

The desktop-optimized website wireframe adopts a **scrolling layout** for smooth navigation. The **header** section includes a fixed **navigation bar** with menu options that, when clicked, scroll the user seamlessly to specific sections further down the page. The **branding icon** on the left maintains the site's identity throughout the user experience.
